VESPA PRIMAVERA 50

The new Vespa Primavera is back today, with a wealth of those values that produced the legend. Youthful, innovative, technologically ground-breaking, agile and dynamic, with an eye to the protection of the environment of which it is the star, the Vespa Primavera is the protagonist of its time, inheriting all the freshness and joy of life that go hand in hand with the story of a model that is a cult in the Vespa family tree. With a radically new design, a new body in steel, new sizes, still agile but even more stable and comfortable, Vespa Primavera is reborn - powered by the ultra modern and ecological 50 2T, 50 4T, 125 3V and 150 3V engines - appropriating some of the stylistic and technical solutions of Vespa 946, the most prestigious and technologically advanced model ever conceived.
